USask's Sustainability Plan: Critical Path to Sustainability

Commitment 3: Empower Action

Support a generation of learners

- to shift mindset, expand skillset, and accelerate action
- to achieve the 17 UN Sustainable Development Goals

USask's Sustainability Plan: Empower Action

Engage Sustainability in Curricula

Enable Diverse Learning

Demonstrate & Experience Learning

Equip Champions

Learning for Sustainability

- The deliberate construction of learning experiences, across disciplines, so that graduates can demonstrate proficiency in competencies for a sustainable future.
- Reliable learning includes:
 - Course outcomes that focus on competencies
 - Instructional design that centres students' agency to reflect, share, act
 - Progression in practice & feedback
 - Assessment of students' competencies.

Sustainability Tracking, Assessment & Rating System (STARS) 2019 & 2022

Level 1 content (inclusive)

- Content considers sustainability from a social, environmental, and/or economic perspective.

Level 2 activity (focused)

- Students practice and get feedback and/or reflect on sustainability skills as focus of course.

Level 3 assessed (focused)

- Students are assessed on sustainability competencies.

Level 4 ethos/lived (focused)

- Students take action on sustainability in the course.

“Through *nakaatayihtaamoowin*, we understand sustainability to mean protecting and honouring the wellness of all humanity and creation by taking care of the relationship with which we’ve been entrusted – with the land, with the air and water, with our students, colleagues, and neighbours – guided by mindfulness, respect, and reverence.”

USask’s Sustainability Plan: Critical Path to Sustainability

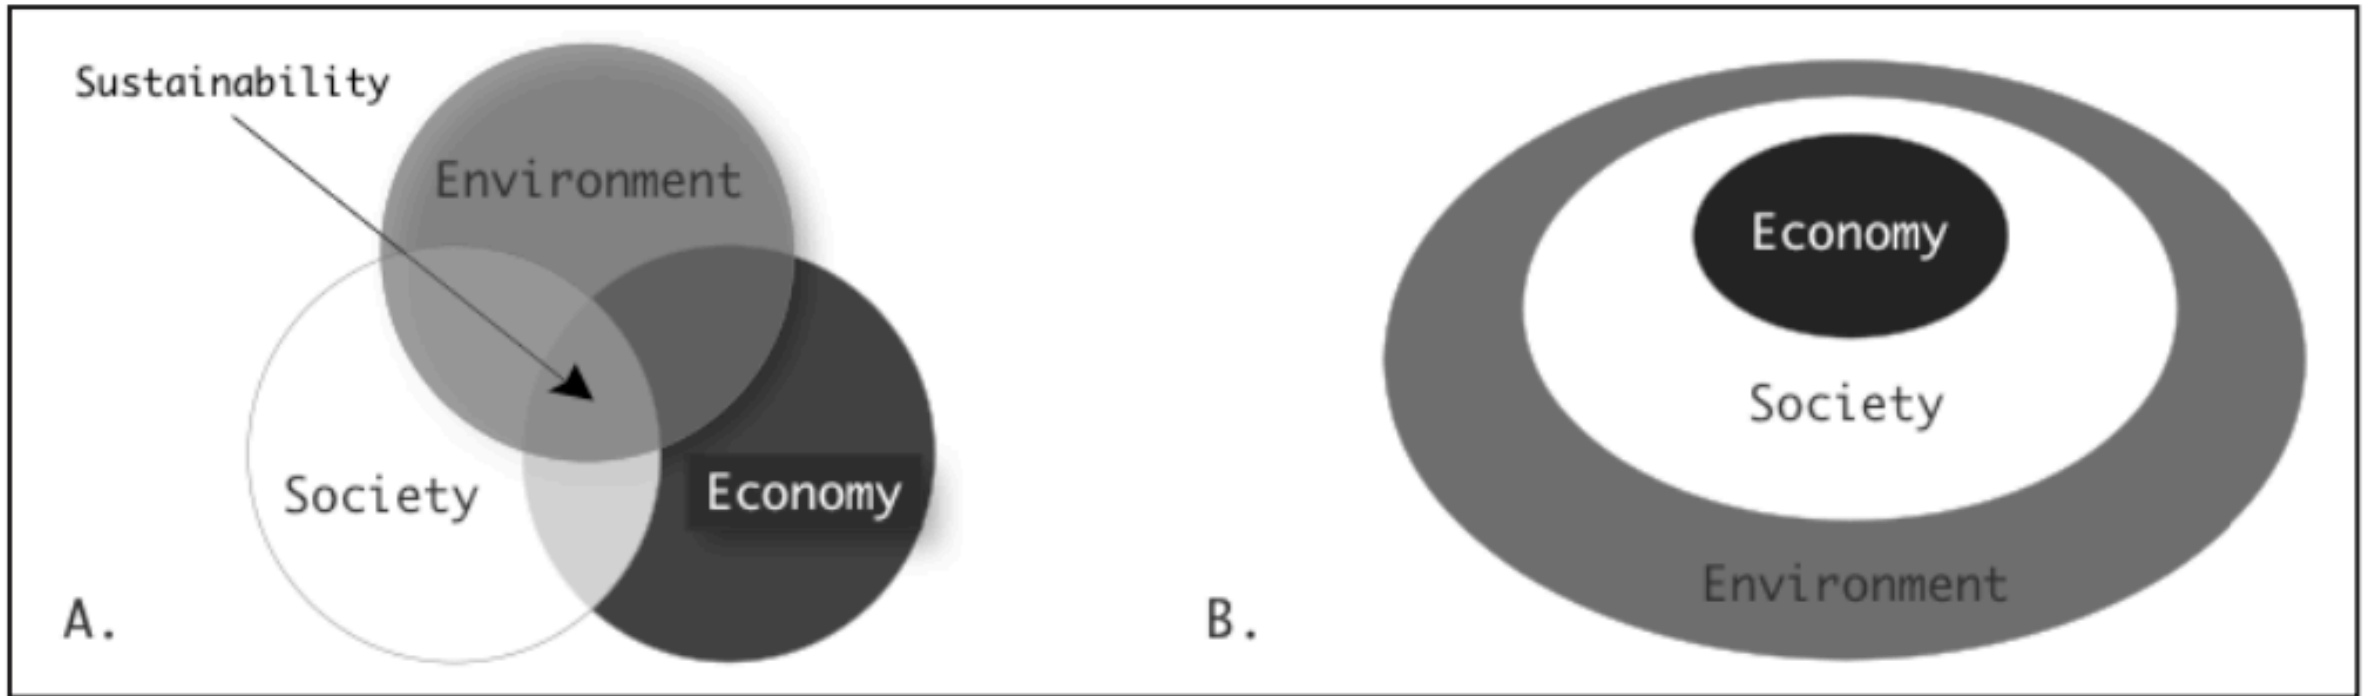

Learning for Sustainability

"The most complex, radical climate technologies on earth are the human heart, head, and mind, not a solar panel."

-Paul Hawken

BE WHAT THE WORLD NEEDS

Enable Diverse Learning

USask Competencies

Communicating Meaningfully

Engaging in our intercultural society

Nurturing Successful Relationships

Leveraging Technology

Adaptive Design and Problem Solving

Cultivating Resilience

Community Engaged Learning

- Sustainability is inherently about solutions to complex ‘wicked’ problems.
- Experiential learning for sustainability links campus and community environments. Places become spaces for the learning process.
- Students act on the UN Sustainable Development Goals
- Support students with a range of CEL and WIL experiences.
- Students report increased competency in teamwork and future-oriented conversations for sustainability.

Community Engaged Learning

“Now, I have a much clearer picture of what sustainable development means and why it is important for us and future generations...I came across multiple sustainable reporting tools and platforms being used...Now I can confidently undertake any project and can, at least, come up with solutions to improve on it.”

– *Student in a transdisciplinary position, Summer 2022*

BE WHAT THE WORLD NEEDS

Equip Champions

Fellowship Development

People, Planet, Prosperity: Sustainability and disciplines

Course, **addressing conflict**, and **personal positionality**

Learning outcomes and alignment

Authentic assessment and sustainability

Place-based learning and leveraging technology

Fellowship Development

Sustainability Competencies

- Students reflect, share, and act on competencies
- Instructional tools/activities

Open Educational Resources

- Resources accessible for students to use and build upon
- Student choice

Experiential Learning

- Place-based learning
- Community engaged projects

Students T1 Pre/Post Survey

To what degree did the feedback you received in this course help you develop skills and knowledge in sustainability?

Optional SLEQ Module on Learning for Sustainability

To what degree did the learning experiences in this course help you improve your sustainability-oriented skills, such as problem solving?

Student Voices

“Now that I understand the definition of sustainability more, I am confident in my abilities to contribute to the SDGs. I feel that a better understanding of the SDGs will allow me to be prosperous in my personal, work, and economic life, as well as educate others on the importance as well.”

Student Voices

“I have learned so much how [Health-related discipline] can influence sustainability through so much more than just good health and well-being... such as sustainable cities and communities, infrastructure, reduced inequalities, life on land, climate action, quality education, and institutions...”

Student Voices

“I learned from this course about the potential to have sustainable farming. For awhile I believed was a myth or something for the future to find out. It just happens that we are that future, we can provide sustainable agricultural practices.”

Teaching practices that support growth of student competencies

- Prioritize student choice
- Change mind, heart, and skill sets
- Design reflective practices
- Leverage interdisciplinary
- Community connections

Questions as we take next steps

What change do we want to see in a year from now?

What are the models of change we grow and sustain?

How can we maintain momentum after Fellowships?
